

Slimline™ Surface Mounted Patient Headwall

The **Slimline Surface Mounted Patient Headwall** is designed to accommodate lighting, electrical receptacles, medical gas outlets, nurse call, data and telephone outlets in a convenient package.

The enclosure is constructed of extruded, heat-treated, anodized aluminum alloy sections to provide a modular, surface-mounted wall unit. Integral horizontal raceways are included for normal power, emergency power, communications and medical gas pipes. The fascia can be removed for access to individual components mounted within. A wide choice of colors is available for the fascia. Each unit is pre-wired and pre-piped for easy field connections.

The Slimline is UL listed and CSA recognized. The headwall can be manufactured in accordance with NFPA, HTM2022 or DIN standard
